Re: Groundwater Contamination

Dear [REDACTED]

On September 5th of this year, at the request of the Indiana Department of Environmental Management (IDEM), the United States Environmental Protection Agency, (U.S. EPA) sampled your well water looking for a variety of volatile organic chemicals (voc's). The results of this sampling have shown contamination from Trichloroethene (TCE) in the amount of 96 ppb (parts per billion). Also, trace amounts of, Chloromethane, 1,1 Dichloroethane, and 1,1,1 Trichloroethane were found.

The U.S. EPA has established an emergency level or Removal Action Level (RAL) for the TCE at 300 ppb. Above this level triggers U.S. EPA support in dealing with this problem. Although your level of contamination is below this emergency level, your home is in close proximity to one of your neighbors whose level of contamination is at/above this level. This places your home potentially at risk from the TCE contamination.

As a result, you agreed to the EPA placing in your home a "Point-Of-Entry" water filtration system, which will provide you with safe drinking water. I plan on sampling your water sometime in the spring of 2008 to check that all is working correctly with the system. I will also replace the activated carbon in your system sometime in August of 2008 as part of EPA's maintenance commitment to the project. It continues to be my understanding that IDEM will provide this service after EPA's departure in September of 2008.

If you have any question, please call me at 312 886-1959.

Sincerely,

A handwritten signature in cursive script that reads "Kenneth M. Theisen".

Kenneth Theisen, U.S. EPA

RE: Results of June 16th, well test

Dear [REDACTED]

The results of our recent analysis to check on the effectiveness of the water filter the U.S. EPA installed in your home last fall indicates **non-detect** for all of the chemicals we looked for. In other words, your filter is working and filtering out **all** of the harmful chemicals found in the local groundwater.

If you have any questions, I can be reached at 312 886-1959.

Sincerely,

RE: Results of June 16th, well test

Dear [REDACTED]

The results of our recent analysis to check on the effectiveness of the water filter the U.S. EPA installed in your home last fall indicates **non-detect** for all of the chemicals we looked for. In other words, your filter is working and filtering out **all** of the harmful chemicals found in the local groundwater.

If you have any questions, I can be reached at 312 886-1959.

Sincerely,

A handwritten signature in cursive script, appearing to read "Ken Theisen", is written below the word "Sincerely,".

Ken Theisen, U.S. EPA Region V

Sincerely,

A handwritten signature in cursive script that reads "Ken Theisen".

Ken Theisen, U.S. EPA Region V

ACCESS AGREEMENT

Recently the discovery of the chemical contaminant (trichloroethylene or tce) was found in your groundwater. That contamination is currently or could in the future affect your residential well and thereby the health and welfare of you and your family. The United States Environmental Protection Agency (U.S. EPA) would like to provide you with either a point-of-entry or a point-of-use filtration system. Please read the following:

As the owner of the residence located at [REDACTED] I grant access to the (U.S. EPA) and its contractors for the purpose of installing, a *Point-of-Entry or a Point-of-Use Water Filtration System*.

U.S. EPA will provide operational and maintenance assistance on the system for a one year period. I understand that any operational and/or maintenance costs necessary to ensure the effective operation of the system after a one year period, not borne by the Indiana Department of Environmental Management (IDEM), will be my responsibility as the homeowner. It is the present understanding of the U.S. EPA that IDEM will be paying for these costs.

I understand that the system and the labor to install it, is being provided to me, the homeowner, free of charge, by the U.S. EPA for the purpose of removing the contaminants found in my well water.

I understand that any costs associated with the removal of the system in the future will not be the responsibility of the U.S. EPA.

I understand that if I refuse this offer, there is no guarantee that it will be offered again in the future.

YES

NOTES:

Results in shaded boxes exceed one or both of the regulatory levels.

IDEM - Indiana Department of Environmental Management

MCL - Maximum Contaminant Level (National Primary Drinking Water Standard)

NA - Not analyzed

ND - Not detected at the method detection limit

NP - Data not provided

RAL - Superfund Removal Action Level For Contaminated Drinking Water Sites

U.S. EPA - United States Environmental Protection Agency
